

Alternative Energy Flyer

You will be assigned a type of alternative energy. First, you will research your topic and gather pertinent information. Some of the major things you should be gathering are:

What is it?

How does it work?

What are the benefits?

What are the drawbacks?

Where is it being implemented?

What are the best places for this type of energy?

Include any interesting statistics

Make it look good

Secondly, you will be presenting your flyer to the class. This should highlight the major points of your type of energy. This should be a 2 minute presentation.
